

Shown with Hydro-X Vacuum Pac

Hydro-X Xtreme Xtractor

A patented Suction Roller provides both suction and compression—forcing water to the surface then sucking the water away, not allowing the water to be reabsorbed back into the carpet and pad. Steerable and self-propelled with positive chain drive—no belts to break or adjust. Variable speed for every carpet and pad condition. Extracts in both forward and reverse. Corrosion-resistant stainless steel.

- The 115V Hydro-X Vacuum Pac is compatible with the Xtreme Xtractor and outperforms all truck-mount vacuum sources.

80250	Scrub Wand, Double Bend	Each

Flood King DX Extractor

The Flood King DX is the heart of the ultimate extraction system of the future. When you need to access multi-story units, when security is an issue, or if you're looking for a low-cost way to enhance the versatility of your fleet, the new Flood King DX is the solution. It will optimize the deep extraction tools you have now as well as those yet to come. It's also the only flood pumper with Microban® product protection.

- Improved performance
- Compact size, easy to transport
- Advanced filtration
- Quieter operation
- Antimicrobial protection
- Integrated hose wrap and wand storage

F332	Flood King	Each

WaterClaw® Extractor

Can de-flood 1,000 sq. ft. in less than one hour, removing up to 90% of the water from both carpet and pad. Spring-loaded adjustable handle automatically breaks vacuum between the carpet and tool for easier and faster flood extraction. Newly designed bottom plate for improved sub-surface extraction and drier face fibers. Metal hose flange for greater durability, accepts 1½" or 2" hose cuffs.

AC014	WaterClaw Small	Each
AC016	WaterClaw Medium	Each
AC018	WaterClaw Large	Each
AC012	WaterClaw Spot Lifter	Each

Rover HVE

The Rover HVE is a superior high-volume extractor. It offers unsurpassed maneuverability and strong performance on all types of carpets, even commercial. The patent-pending stainless head with custom GreenGlide has a self-healing edge that rides easily over the carpet and maximizes extraction. The Rover's joystick precisely controls separate drive wheels that allow the Rover HVE to maneuver around the sharpest corners with ease.

- Wider extraction path
- Unsurpassed maneuverability
- GreenGlide
- Joystick-operated
- Stainless steel frame
- Stainless steel head design
- Two-speed switch
- Clear take-up tube
- LED light
- Collapsible handle
- Transport wheels
