

PORTABLE EYEWASH STATIONS

Pure Flow 1000

Universal Cart with Waste Container
(Shown with a Porta Stream Dispenser)

Refill Cartridges

Pure Flow 1000® Emergency Eyewash Station

fend-all

Dispenses purified, pH-balanced Eyesaline® solution without the need for plumbing. Fluid cartridges are factory sealed which eliminates mixing, measuring and the opportunity for contamination prior to use. Eyesaline is nonirritating and balanced to the pH and salinity of human tears. The solution delivery module is an integrated unit consisting of Eyesaline cartridges, delivery tube and nozzle assembly. The **Pure Flow 1000** holds two cartridges (sold separately), each containing 3.8 gallons of Eyesaline solution, which dispenses upon activation at a flow rate of 0.4 gpm (15-minute cycle). When the delivery module is empty, a "Service Immediately" warning is displayed. Pure Flow 1000 captures its own waste fluid, eliminating spill hazards. Wheeled **Universal Cart** allows for easy mobility, and fits the 28-Gallon **Waste Container**. Two-year maintenance-free life cycle. SEI certified to meet ANSI Z358.1-2004.

On-Site® Gravity-Fed Eyewash Station and Waste Cart

Bradley

The **On-Site Gravity-Fed Eyewash Station** is transportable and can be easily relocated to the point-of-need even when assembled and filled. The 7-gallon unit weighs just 60 lbs when full. Station can be mounted to a wall or placed on a countertop or other solid surface. A transparent polycarbonate tank makes it easy to see when it is time to clean or refill the unit. Water flow is activated when the hinged eyewash tray is pulled down. Sprayheads provide a continuous flow for 15 minutes at 0.4 gpm. Safety sign included. An insulated **Heater Jacket** accessory warms the eyewash station and thermostatically controls water in temperatures as low as -20°F. It utilizes silicone rubber heaters, powered by a standard 120V plug. Jacket includes indicator lights to ensure proper heater operation. **Waste Cart** includes rigid casters in front and locking swivel casters in back for easy transportation of the Gravity-Fed Eyewash Station. Features a 56-gallon waste collection tank with a 1/2" petcock at bottom for the easy draining of waste. Meets ANSI Z358.1-2004. SEI Certified.

EYEWASH / SHOWERS

E/A3825

NORTH

Eyewash Bottle

Includes an eye cup and a perforated spray plate that breaks up the stream of eye solution for a gentle eye rinse. The capped air vent valve prevents contaminated liquid from being drawn back into the bottle, while a drain tube releases used liquid. Snap-on cover keeps the eye cup clean when not in use. Bottle is clearly marked as containing eye wash solution and has a simple usage diagram on the outside. Bottle is sold empty.

SPERIAN Saline Eye/Face Wash Wall Stations

Provide immediate flushing of the eyes and face until an injured person can reach a primary eyewash device. Mounts easily with fasteners provided. Durable, easy-to-clean plastic is bright green for high visibility in hazard areas. **Single Station** comes with one 16-oz or 32-oz bottle, and the **Double Station** comes with two 32-oz bottles. Bottles contain Spierian™ Saline, a sterile buffered solution similar to human tears. They feature a tamper-resistant twist-off tab, an extended-flow nozzle and a three-year shelf life (from the date of manufacture). Classified Personal/Secondary.

Emergency Eyewash Fountain

The Emergency Eyewash Fountain is a reliable and economical eyewash source. Its two spray heads are easily installed in any sink or basin, and does not require a plumber or special installation.

Item No	Description	Unit
NORE/8125	Emergency Eyewash Fountain	Each

Eye and Eye/Face Washes

Wall-mount units utilize either a 10"-diameter impact-resistant yellow plastic bowl or corrosion-resistant stainless steel bowl. The wall bracket is heavy-gauge aluminum and has three holes for easy mounting. Exposed pipes and bracket are covered with Bradtect™ safety yellow polyurethane to protect the unit from corrosion. Units activate quickly with a highly visible plastic push handle and 1/2" IPS chrome-plated brass stay-open ball valve. Twin spray heads feature a flow control and pop-off dust covers. All units include a safety sign and inspection tag. Water supply: 1/2" IPS (female). Meets ANSI Z358.1-2004. SEI Certified.

Combination Drench Shower with SpinTec™

The innovative contoured SpinTec showerhead design creates a spinning motion with the water flow, which results in an optimal spray pattern that uniformly distributes water and allows for more coverage for the user. The SpinTec showerhead has a small profile and uses 66% less water than older standard models. The Combination Shower features both a shower unit and an eye or eye/face wash bowl. The shower is activated by a pull rod and 1" IPS chrome-plated stay-open ball valve. Eye and eye/face wash sink includes twin spray heads with a flow control and pop-off dust covers, and either a yellow impact-resistant plastic or stainless steel 10"-diameter bowl. Eye and eye/face washes are activated by a push handle (hand or foot) and 1/2" NPT chrome-plated stay-open ball valve. Units include a 1 1/4" galvanized pipe and floor flange, both of which are protected by a yellow polyurethane coating which withstands harsh/corrosive environments. Safety sign and inspection tag are also included. Water supply and waste: 1 1/4" NPT (female). Meets ANSI Z358.1-2004. SEI Third Party Certified.

Portable Pressurized Eyewash

A stainless steel pressure tank includes a tire filler valve with a 0-160 PSI air gauge, a pressure-relief valve to prevent over-pressurization and built-in carry handles for easy transportation. Eyewash assembly has twin eyewash spray heads with a flow control and pop-off dust covers. The unit is activated by a large stainless steel push handle with a stay-open ball valve. A supplemental hose spray for face and body rinse has an 8' yellow hose with hand-held squeeze valve.

10-Gallon Eyewash maintains a minimum 15-minute water flow (3 1/2-minute hose flow).

15-Gallon Eyewash has a minimum 22-minute flow (5-minute hose flow). Optional 510 watt silicone **Heater Jacket** keeps water warm in temperatures as low as -10°F. Meets ANSI Z358.1-2004. SEI Certified.

Thermostatic Mixing Valve

Blends hot and cold water to a comfortable flushing temperature. ANSI standards require tepid water to ensure that eyewash and drench shower users are not subject to scalding or freezing water. Valve is preset at 85°F but can be adjusted to other temperature set points.

8 gpm accommodates up to three eyewashes or one eye/face wash; **36 gpm** is for use with one combination shower/eyewash, one drench shower, or multiple eyewashes; **67 gpm** accommodates up to two combination showers/eyewashes, three drench showers or multiple eyewashes; **103 gpm** is for use with up to three combination showers/eyewashes, five drench showers, or multiple eyewashes. **Note:** Bradley Fixtures Corporation recommends the use of the S19-866, 20 gpm showerhead flow control when sizing drench showers and combination drench showers with eye washes.

COOLING ACCESSORIES

Chill-Its® 6100/6200 Phase Change Cooling Vest I/II

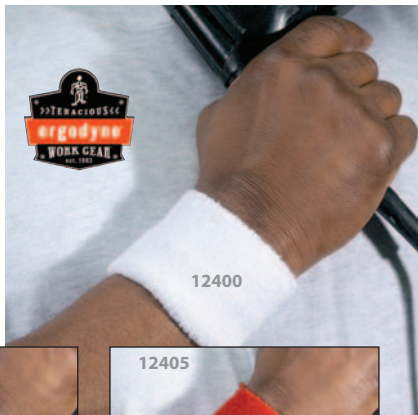

The Phase Change Cooling Vest maintains a constant temperature of 55°F for up to four hours, which helps keep workers cool and safe from heat stress. Vest is constructed from cotton khaki, treated with flame-resistant Banox FR3®, and is cooled by a cooling charge pack. Hook-and-loop closures at the shoulders and on elastic straps which surround the torso allow for maximum adjustability. Comfortable lightweight, over-the-shoulder design. **6100** is designed for small- to medium-sized adults and the **6200** fits larger adults. Launderable.

Chill-Its® Body Technologies Model 6717 Hard Hat Pad and Neck Shade

Conveniently attaches to a hard hat suspension headband to shade the neck and cool the top of the head. Chill-Its Body Technologies use an evaporative cooling process to help workers stay cool, fight fatigue, and increase productivity. Absorbent acrylic polymer activates quickly when soaked in cold water for 10 to 15 minutes. It remains hydrated, providing cool comfort for 24 to 48 hours. Reusable, just resoak. Hook-and-loop closure quickly fastens in place for easy on and off. One size fits all. Reversible.

ERG12336	Hard Hat Pad w/ Neck Shade	Each

Hydration Backpack

Keeps water or electrolyte beverages as close and handy as your own back. Holds 70 oz of fluid on your back, keeping your hands free for working. Equipped with the Soft Gulp™ Valve, a comfortable locking mouthpiece that allows high flow but won't leak. Cleaning and filling is easy, because the hose and large-mouth reservoir are removable. The backpack has a full side zipper, providing easy access to the reservoir. Extra padding on the contoured shoulder straps makes it comfortable to wear, and the waist strap and removable sternum strap hold the pack close to your body. Hand washable.
